## The Escape Rooms

**Crime** - You're sitting in your friend's home, twiddling your thumbs waiting for them to get home. Footsteps on the path sound like him but the uncharacteristic knocks on the door make you think otherwise. Your friend turns out to be a man on the run from the criminal underworld, the people at the door are hunting him down, and you proceed to hide in his panic room basement. In your panic, you lock yourself in with no obvious way out. Your oxygen will not last forever. Can you escape in time?!

**Piracy** - A creaking old merchant navy tanker chugs through storms in the Indian ocean, its cargo is classified. Onboard, you and the crew are on a journey from Hong Kong to Bremen are heading towards the Suez Canal and you've grown paranoid of your captain who is acting more fractious as time passes. Your shady captain calls for an emergency meeting and you and you end up locked in a cabin as the tanker appears to veer and change direction. You must escape as soon as you can and challenge your captain before it is too late!

**Hijack** - Potential hijackers have been tracked down to a strange, dark and dilapidated house in the quiet outskirts of a city. You're on the team of specialists sent to investigate. You get inside the house and are searching through its hidden chambers when you find yourself stuck inside a secure room that contains clues to the hijacker's next target. You need to decode the plans before it's too late, and escape to alert the world.
